Industry Outreach

On May 12, Matt

From the Desk of the VP of Regional Chapters

DMTF's China Chapter, established at the beginning of 2013, has been making progress on both technical work and regional marketing efforts with contributions from the DMTF Executive Committee, Regional Chapter Committee (RCC) and China Chapter Board members.

On the Technical Committee side, localization of DMTF standards work has continued to make progress during the first half of 2014. With the emerging trend in China of the public, private and hybrid cloud adoption, the chapter considered several options but decided to focus the first batch of document translations on CIM, the foundation of DMTF standards, and CIMI. Thank you to the China Chapter Technical Committee Chair Tian Zhong and all the China Chapter Board members for their contributions.

On the Marketing Committee side, a series of technical-focused marketing activities have been discussed and included in the China Chapter 2014 work plan, one of which was hosting the International Standard Forum at the China Cloud Computing Conference (CCCC) in Beijing on May 20. The event aimed to introduce global cloud

Rutkowski, DMTF Cloud Auditing Data Federation (CADF) co-chair and IBM Senior Engineer, presented, “An Overview of Cloud Auditing Support for OpenStack” at the OpenStack Summit in Atlanta. The presentation provided an overview of the recent enhancements made in OpenStack projects to support API and security auditing using the DMTF CADF standard and included fellow speakers from IBM and OpenStack.

Across the globe on May 20, DMTF President Jeff Hilland chaired the International Cloud Computing Standardization Forum hosted by the DMTF China Chapter at the China Cloud Computing Conference (CCCC) in Beijing. The event aimed to introduce global cloud computing standardization achievements to the Chinese IT industry and its customers. Experts from global cloud computing standard development organizations shared their latest progress on cloud computing standardization, examined ways for cloud computing standards to connect with the industry and forecasted developing trends.

Lastly, you can view DMTF Chair of the Board Winston Bumpus’ participation in the panel session, "Lessons Learned in Mobility" from the recent NIST: The Intersection of Cloud and

computing standardization achievements and future trends to the Chinese IT industry and its customers. As the first China-based International Standard Forum, we believe this has provided a good starting point to stimulate cloud standard participation in China. The Forum, the first of its kind, was designed to bring all of the different standard organizations together to discuss cloud standards. DMTF President Jeff Hilland was the forum chair and spoke about DMTF’s work. CCCC is the biggest cloud conference in China attracting 30,000 attendees each year for the past six years.

Looking forward to the second half of 2014, the China Chapter will continue to provide native-language DMTF standards and other information to China’s vendor community for adoption and inclusion in a variety of products and services. In addition, the chapter will work to create and drive broad industry adoption of the DMTF established standards and specifications throughout the region.

While making progress on the first regional chapter, the RCC will continue to explore additional opportunities for other initiatives in different regions. None of these accomplishments would be possible without the contributions of our members. I would like to take this opportunity to thank the China Chapter, Executive Committee and RCC for their excellent work. We look forward to even greater success in the future!

Yinghua Qin, DMTF VP of Regional Chapters

Upcoming Events

DMTF Alliance Partner Technical Symposium
July 21-25, 2014
Portland, Ore.

Hosted by the DMTF and jointly sponsored by the Storage Networking Industry Association (SNIA), the eighth annual Alliance Partner Technical Symposium will offer a variety of meetings focused on technical topics while addressing the technical work of interest to each of the DMTF’s Alliance Partners.

Join us at the event. Register today!

8th International DMTF Academic Alliance Workshop on Systems and Virtualization Management: Standards and the Cloud

SVM '14 will be held November 17 in Rio De

Mobility event at the National Institute of Standards and Technology.

Thanks to each of these volunteers for sharing the work of the DMTF at such important industry events!

DMTF Volunteer Spotlight

Thank you to the volunteers and members of the DMTF that keep our organization running strong!

* Lawrence Lamers has been confirmed as the vice chair of the Cloud Management Subcommittee

* Peter Lamanna has stepped up as the new chair of the Common Diagnostic Model Forum

* The System Management Forum welcomes Svia Sathappan as the new vice chair

DMTF in the News

"Reinforcing our commitment to interoperability: Dell Joins the DMTF Board of Directors" - *Dell4Enterprise*

"六届中国云计算大会在北

Symposium (APTS) is right around the corner, to be held July 21-25 in Portland, Ore. The event is jointly sponsored by the **Storage Networking Industry Association** (SNIA) and offers meetings focused on technical topics in conjunction with addressing the technical interests of DMTF's Alliance Partners. In addition to the DMTF Board and Technical Committee meetings, various Working Groups will be holding face-to-face meetings for members. See the Mark Your Calendar section above for a complete list.

Alliance Partner organizations to be represented at the event include China Electronics Standardization Institute, Open Grid Forum, The Open Group, SNIA, TeleManagement Forum, The Green Grid and Trusted Computing Group.

Keynote sessions will be offered Tuesday, Wednesday and Thursday, and will include in-depth information on Open Software Defined Data Center (OSDDC) and SNIA's Software Defined Storage (SDS).

Interested in sponsoring the event, accessing the agenda and schedule, or need registration information? Please visit the event's **website** for additional details.

DMTF Now Enables Member Software Submissions

The DMTF – built on a foundation to promote technical standards – has been engaged in an ongoing effort to increase the adoption of existing standards and promote the publication of new standards to enable effective management of IT environments.

To advance these efforts, the

Janeiro, Brazil. The workshop is dedicated to academic research on standards and new technologies for systems and virtualization management. The DMTF is now accepting papers for the event. Submissions on topics related to managing clouds, virtualization of distributed resources/services and work in management standardization are particularly encouraged. Click here for more information about topics and how to submit.

DMTF Webinars on BrightTALK

BrightTALK™

Join us at 9:00 a.m. CDT Tuesday, June 24 for the live presentation, "Establishing Trust in Clouds Using the Cloud Auditing Data Federation Specification" hosted by DMTF CADF Co-Chair Matt Rutkowski of IBM. Listen in and submit your questions live or access it on-demand following the event along with all of DMTF's webinars on our BrightTALK channel in the Leaning Center.

organization welcomes the development of new projects, which will now include software, in addition to the specification work that the DMTF is internationally known for. Participation in software projects within the DMTF is now available for member companies that sign and agree to the new **Members' Software Submission Agreement**.

This new benefit of membership will complement the development of standard specifications by allowing for submission of related software examples and other software tools. This agreement also allows for future opportunities for the DMTF to contribute to and collaborate with Open Source efforts.

For more information, visit our **Operating Policies** page.

DMTF Officer Appointments Held Next Month

At the July 21 Board meeting in Portland, Ore. during the Alliance Partner Technical Symposium, new executive officers will be appointed to serve the DMTF and its members. Nominations were accepted from the current slate of officers at the May Board meeting and will be solicited from all Board and Leadership-level voting members later this month.

Board and Leadership-level member company representatives are eligible for participation. Those interested in serving, or nominating a potential candidate, are encouraged to **contact DMTF's Executive Director** for further information.
