- support a variety of Web services management protocols to register, discover, access, and query the relevant types of information about the cataloged management resource.
  - support advertising resources that use a variety of models, e.g. CIM or TeleManagement Forum's SID mapping.
  - While one of the goals of the working group is to provide a solution for CIM resources, this solution must not be limited to CIM resources. Binding specifications can be authored by other groups interested in providing a mapping for a specific non-CIM model type to the catalog.

55 The ResourceCatalog Format will not:

- 56
- 57
- 58
- 59
- restrict the set of Web and Web service based protocols that can be used to access the catalog for registration and discovery
  - restrict the set of protocols that can be used to access resources advertised in the catalog.

60

## 61 **Alliance and Working Group Partnerships**

62 This group will coordinate with other Alliance Partners as needed.

63

## 64 **Reliance/Coordination with Other Working Groups**

65 This group will coordinate internally with other DMTF working groups as  
66 needed.

67

## 68 **Technical Redesign**

69 Other contributions and changes to the input documents will be accepted for consideration  
70 without any prejudice or restrictions and evaluated based on technical merit in so far as they  
71 conform to this charter. DMTF members with extensive experience and knowledge in these areas  
72 are particularly invited to participate.

73

## 74 **Prior Work**

75 WS-ResourceCatalog specification, submitted to the DMTF as a proposal for DMTF  
76 Standardization.

77

## 78 **Current Work – Deliverables**

79

80 Resource Catalog Format Specifications that meet the scope and requirements defined above.

81

82 Specification mapping how the WS-ResourceCatalog can be bound to the CIM Model. This work  
83 will be prioritized to address the immediate needs of other DMTF WGs first.

84

85 The deliverables may be presented in one or more documents.

86

87 Please see the Catalog WG web page (<http://www.dmtf.org/apps/org/workgroup/catalog/>) for  
88 current specification drafts, milestones and timelines.

89

## 90 **DMTF Contacts**
