Alliance Organizations

China Communications Standards Association (CCSA) and the Distributed Management Task Force (DMTF)

Background

CCSA is a non-profit organization for standardization in the field of Information and Communications Technology (ICT) in China. CCSA is organized with the approval of MIIT (Ministry of Information Industry Technology) and registered in the Ministry of Civil Affairs. Several DMTF member companies from China are members of CCSA at the same time.

Alliance Partner Mission

CCSA is contributing to the development of ICT industry in China. It establishes an enterprise-based and market-oriented working system that incorporates the industry, universities and R&D institutes and it conducts communication standardization activities following the principle of "Openness, Fairness, Justness and Consensus."

Alliance Benefits

CCSA is one of the most important standard organizations in the field of ICT and it plays a crucial role in the development of ICT standards in China. CCSA has been focusing on the Cloud Computing for years. DMTF is a global recognized body that develops technology specifications for enterprise and cloud management. CCSA and DMTF will work together in relevant industry standards to ensure that the standards will have larger impact in China and in Asia Pacific Region. CCSA will provide feedback on draft standards to the relevant DMTF groups.

Standards Development

DMTF will brief CCSA on its relevant standards that have been developed or are in development. DMTF will make relevant documents available via its Work In Progress and feedback portal processes, for early review by CCSA.

CCSA will provide its deliverables to DMTF, and will invite DMTF to state how its relevant published and draft standards satisfy requirements articulated by CCSA.
CCSA may review published DMTF standards and produce statements of their relevance to CCSA published requirements.
