DMTF Membership Benefits

Membership Benefits

DMTF is a leader in developing management specifications and promoting interoperability for enterprise and Internet environments. The organization fosters a cohesive, cross-industry environment that enables end-users, vendors, implementers and Alliance Partners to choose from a mix of systems and solutions that best meet their needs. DMTF standards and tools foster maximum interoperability and reduced engineering costs, while creating larger markets for DMTF specifications-based products, systems and solutions.

DMTF members benefit from:

- Front-line access to information about DMTF standards and tools
- The opportunity to participate in the definition of these standards
- The synergy of working with implementers of these standards and tools

Levels of Membership

Membership Fees & Entitlements (Membership fees prorated from April 1 of each year)	Leadership Member	Participating Member	Monitoring Member	Sponsoring Member
Membership Fee (e.g. vendors, integrators, etc.)	$12,000	$6,000	$2,500	$200
Discounted IT End User/Government Fee	$6,000	$4,000	N/A	N/A
Vote in DMTF Marketing & Technical Committees	x			
Chair a DMTF Work Group	x			x
Establish new Work Group charter(s)	x			
Participate in Work Groups	x	x		
Participate in DMTF certification programs	x	x		x
Involvement in press activities, tradeshow and Web marketing	x	x	x	
Early access to DMTF standards, technology, tools and information	x	x	x	x

Alliance Partner Memberships (complimentary) are a way for DMTF to formalize synergistic relationships with other industry standards groups. DMTF offers building block and complimentary technologies that are applicable to many domains of IT management. An Alliance Partner can save development time and foster greater interoperability, thereby creating larger markets for standards-based products, systems and solutions by contributing to and extending DMTF standards. Strictly for non-profit industry organizations that create and adopt standards, this membership category is intended to clarify roles and provide mutual benefit to the organizations and DMTF.

Academic Alliance Memberships (complimentary) are intended for individuals of accredited higher learning institutions. DMTF values input from the academic world and is open to providing information to faculty and students who study and research IT management standards. Academic Alliance members provide valuable input through participation in Work Groups as non-voting members. In addition, a yearly conference is offered to Academic Alliance Partners interested in participating and sharing progress of research and application of DMTF standards.

For information on how to become an Alliance Partner or Academic Alliance Member, please contact DMTF Administration at admin@dmtf.org. Visit http://www.dmtf.org/join/company/ to become a DMTF member.
