Farewell and Best Wishes to Jon Hass

After 18 years on staff, it's time for Jon to take his well-deserved retirement! Jon has been a significant contributor to the DMTF since the early days, when he was integral to the development of the Common Information Model (CIM). As part of his dedication to the organization, Jon has held every role on the Board of Directors, including Chair of the Board.

Jon's contributions to the DMTF cannot be overstated. He has been involved in numerous standards initiatives, including the System Management Interface (SMI) and the System Management BIOS (SMBIOS). His dedication to ensuring the interoperability of IT systems has been a cornerstone of the DMTF's success.

Jon has always been a vocal supporter of the organization, promoting the benefits of standards-based management solutions. He has played a key role in the development of the Redfish framework, which provides a modern and extensible interface for managing IT infrastructure.

As one of the industry's most vocal supporters of interoperable standards, Jon's tireless work on behalf of DMTF increased the organization's stature and ensured its enduring relevance. Please join us in welcoming Richelle to the Board of Directors!

About DMTF

DMTF creates open manageability standards spanning diverse emerging and traditional IT infrastructures including cloud, virtualization, network, servers and storage. Member companies and alliance partners worldwide collaborate on standards to improve the interoperable management of information technologies.
