2020 Year-in-Review

In times of unprecedented change and incredible challenges, DMTF continues to focus on what matters most — our member companies and the industry. As we reflect on the past year, we acknowledge the efforts of all DMTF members for going above and beyond and recognize our Star Award recipient—DMTF's equivalent of the Super Bob Stevens (Dell Technologies), and Linda (Broadcom Inc.), Justin King (IBM), Theo Boyd (Dell Technologies), Brett Henning (Lenovo; and NetApp).

The 2020 Star Awards recipients include Jeff (the management software stack that implements the Upper (data model) Layer protocols for Redfish). Redfish is the ideal forum for industry-leading companies to come together in a neutral, non-competitive environment to advance standards and initiatives. To learn more about the benefits of membership, you can visit the DMTF website or contact us online or reach us at press@dmtf.org.

Start Planning Now for Membership Renewal

Congratulations to the DMTF staff and volunteers for their ongoing commitment to advancing DMTF standards and initiatives. You can learn more about the organization's achievements in the past year and how to get involved in the future by visiting the DMTF website or contacting us at press@dmtf.org.

About DMTF

DMTF is a technology standards organization comprised of industry-leading companies. The organization's mission is to define open standards that advance the management of information technologies. DMTF is committed to ensuring that its standards meet the needs of the industry, and that they are developed in an open, neutral forum. DMTF is headquartered in San Diego, California, USA, and is a member of SNIA (Storage Networking Industry Association).
