Redfish Release 2022.3 Now Available

What’s Ahead for 2023

The goals of the alliance are to develop and promote industry standards and to foster the advancement of today’s infrastructure. The mission of helping people build and operate the most secure, manageable, and efficient IT infrastructure possible drives the work of the DMTF Alliance. The alliance represents leading companies to come together in a global standardization effort.

As part of DMTF’s mission, the DMTF Board of Directors approved a program to expand membership to all sizes of organizations and enable participation in special interest groups. This includes opening the following DMTF Partner programs:

- Foundation Partner Program
- Program Partner Program
- Associate Member Program
- Full Member Program

Additionally, it helps avoid re-defining property names already in use. Improved terminology for MessageId and related tokens and added Redfish message registries. With the release of the CXL device and fabric models, we are also planning for the publication of the CXL server and reference device profile. The Redfish forum is also working on the development of new messages, including management topics, such as platform events, power events, and environmental events.

Here’s a snapshot of where we’re going and how your company can get involved.

- Redfish 2022.3 is now available for public download. Designed to deliver simple and secure management for hybrid IT and the Software Defined Data Center (SDDC), the Redfish standard takes place in DMTF’s Foundry partner program.
- The Redfish Developer Hub is the one-stop resource for Redfish development. It provides access to Redfish-related documents, guides, and tools. Our Redfish Developers Newsletter is sent out monthly and includes new Redfish resources.
- Redfish Forum – Updated with each new release, this presentation offers a high-level overview of the changes from the previous version. The Message Registry Bundle contains all of Redfish’s message registries.
- Redfish Forum – Updated for 2022.3 this human-readable guide is released. It contains explanations in this resource. Includes example payloads for each resource type.
- DSP0272_1.6.0 – Redfish Interoperability Profiles
- DSP0266_1.17.0 – Redfish Specification
- DSP0266_1.16.1 – Redfish Specification
- Redfish Release 2022.3 Now Available
