Redfish Release 2023.3 Now Available

The Redfish Forum has released Redfish Release 2023.3. This release includes updates to the Redfish schema, message registries, and other redfish-related documents. Some of the highlights include:

- **Message Registry Bundle 2023.3**: This bundle contains all the message registries for Redfish Release 2023.3, including those for HTTP, HTTPs, and WebSocket.
- **Redfish Message Registry**: This registry includes all the message registries for the Redfish 2023.3 release.
- **Redfish Resource and Schema Guide**: This guide provides a high-level overview of the Redfish schema and resources.
- **Redfish Release 2023.3 Overview**: This document provides an overview of the changes made in the 2023.3 release.

The full list of changes and updates can be found on the DMTF website. To access the new release, visit the Redfish section of the DMTF website.

Have you registered for APTS?

ATTENTION DMTF MEMBERS! Your early registration is due March 11, 2024, at 8:00 a.m.

APTS will be held March 11-14, 2024, at the Cliff House, San Francisco, CA. This year, APTS will be a DMTF-only hybrid event. Check your email for the meeting registration link. You can register here.

Upcoming DMTF Workshops

- **2023 Membership Meeting**: Save the date for our next Membership Meeting. The next meeting is planned for April 5, 2024.

You can learn more about the upcoming workshops and meetings on the DMTF website.

In Case You Missed It
