

Redfish

The Redfish[®] Forum

WHO

Technical work on the Redfish[®] standard takes place in the DMTF's Redfish Forum.

WHAT

A standard designed to deliver simple and secure management for converged, hybrid IT and the Software Defined Data Center (SDDC). Both human readable and machine capable, Redfish leverages common Internet and web services standards to expose information directly to the modern tool chain.

WHY

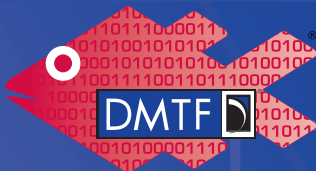

Internationally recognized by ANSI and ISO, DMTF standards enable a more integrated and cost effective approach to management through interoperable solutions.

Join

Participating in Forums allows member companies to benefit by uniting with other members to share the costs of joint initiatives and together succeed at their stated mission. To participate in a Forum, an organization must be a member of the DMTF at the Participation, Leadership or Board level, and must also join the Forum as a member.

Developers: Please Visit the Redfish Developer Hub!

The Redfish Developers Hub (redfish.dmtf.org) is a one-stop, in-depth technical resource – by developers, for developers – designed to provide all the files, tools, community support, tutorials and other advanced education you may need to help you use Redfish.

Redfish Resource and Schema Guide

Designed to help educate users of Redfish, this human-readable guide to the Redfish Schema is continually updated. Application developers and DevOps personnel creating client-side software to communicate with a Redfish service, as well as other consumers of the API, will benefit from the explanations in this resource.

Redfish School YouTube Series

For a comprehensive overview of Redfish, check out our Redfish School on YouTube. DMTF's YouTube series of short technical webinars on all things Redfish features experts presenting mini-tutorials on everything from Redfish architecture to composability. Redfish School can be found here: <https://www.dmtf.org/education/webinars>

Redfish GitHub

As part of the open approach to the development of Redfish, the DMTF shares numerous open source tools for using, testing, validation and more in its public GitHub repository. We invite you to review, participate and contribute in this collaborative community environment: <https://github.com/DMTF>.
