

Redfish Storage Modeling

Mike Raineri
Dell Inc.

Redfish

Agenda

- Resource Overview
- Direct Attached Storage Model Map
- Examples (of Direct Attached Storage)
 - SATA Drives with Single Storage Controller
 - Single RAID Controller
 - High Availability (HA) RAID Controllers

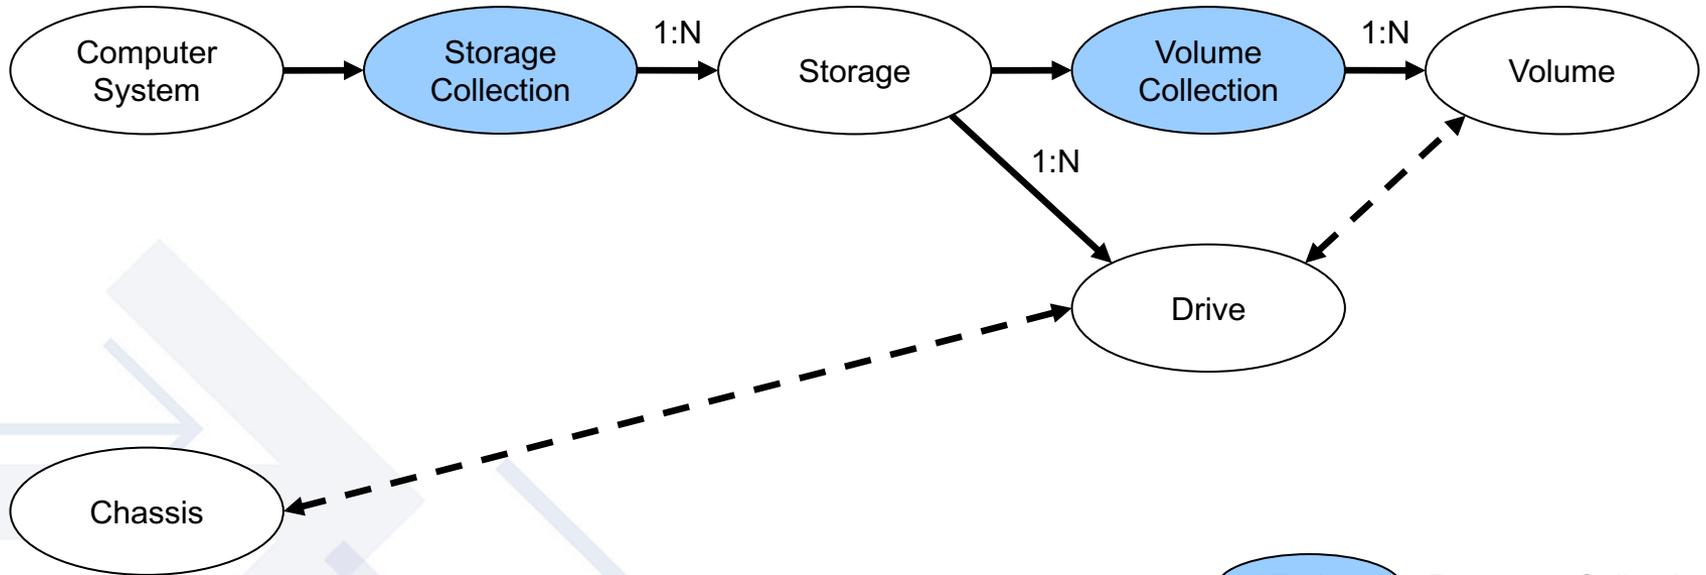

Resource Overview

- **Storage:** A representation of a storage sub-system
 - Contains sets of Volumes, Drives, and Storage Controllers
 - Storage Controller information is an array of objects in the Storage resource
 - Describes the protocols supported by the controller, the speed of the controller interface, and manufacturer information about the controller
- **Drive:** The physical media for the data
 - Manufacturer information about the drive (part number, serial number, etc)
 - Capability information about the drive (size, protocol, encryption, etc)
 - Contains control aspects (secure erase and LED setting)
- **Volume:** The logical construct used by the OS/hypervisor
 - Contains status about a volume (what drives contribute to the volume, size information, identifier information, etc)
 - Allows a client to control the volume (initialization, encryption settings, etc)

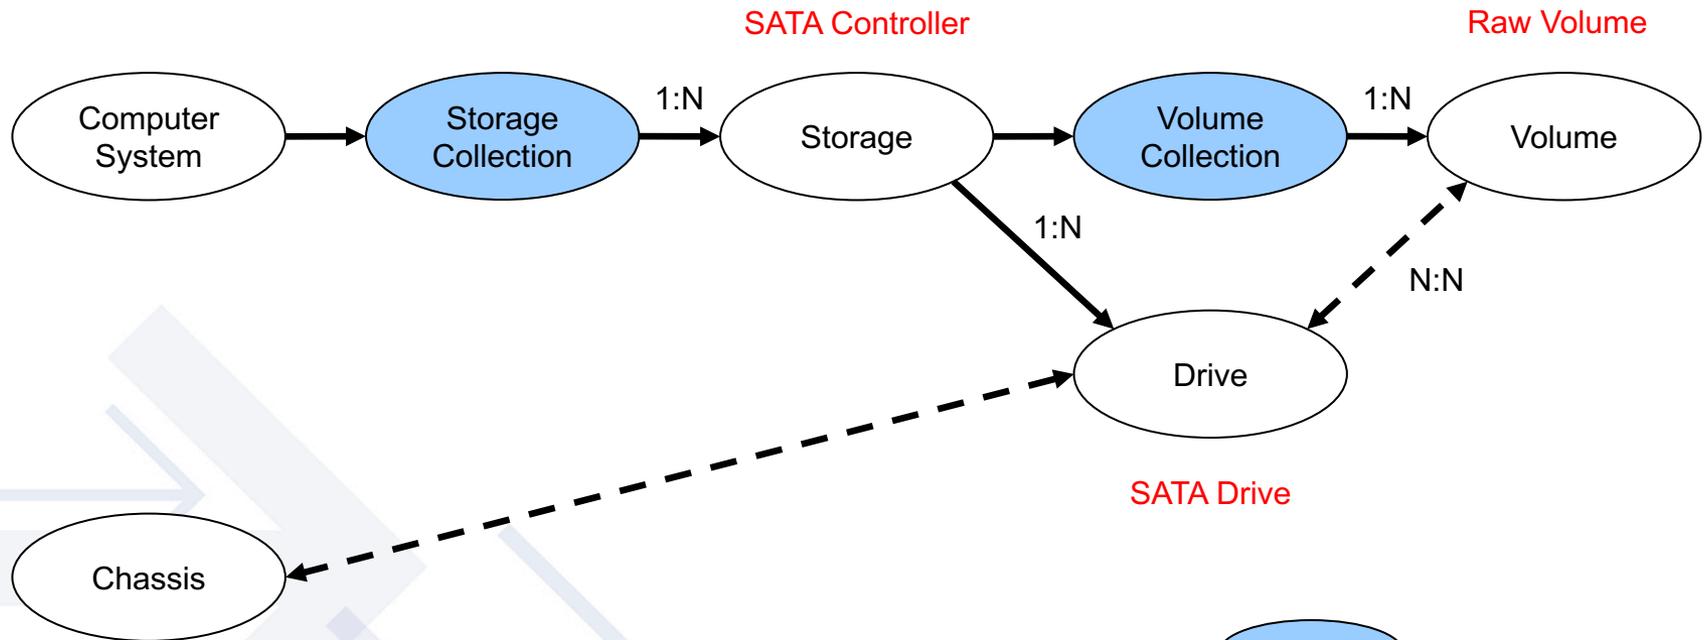

Direct Attached Storage Model Map

-  Entity Resource Collection
-  Entity Resource Instance
-  Subordinate Resource
-  Related Resource

SATA Drives with Single Storage Controller

-  Entity Resource Collection
-  Entity Resource Instance
-  Subordinate Resource
-  Related Resource

SATA Storage Resource Example

```
{
  "@odata.context": "/redfish/v1/$metadata#Storage.Storage",
