AlertIndication

(See Event Model)

SecurityIndication

IndicationIdentifier: string (Required, Override)
AlertType: uint16 (Required, Override)
MessageType: uint16 (Required)
IndicationEndTime: datetime
EventCount: uint16
Effects: uint16[] (Required)
MoreSpecificEffects: string[]
Mechanisms: uint16[] (Required)
MoreSpecificMechanisms: string[]
Resources: uint16[] (Required)
MoreSpecificResources: string[]

IPNetworkSecurityIndication

Protocol: uint16 (Required)
IPVersionSupport: uint16 (Required)
SourceAddress: string
IPv4NumericSourceAddress: uint32
SourcePrefixLength: uint8
DestAddress: string
IPv4NumericDestAddress: uint32
DestPrefixLength: uint8
SourcePort: uint32
DestPort: uint32
SourceMACAddress: string
DestMACAddress: string

IPPacketFilterIndication

Direction: uint16 (Required)
NamingConvention: uint16
SourceHostName: string
DestinationHostName: string
DestinationServiceName: string
TranslatedSourcePort: uint16
TranslatedSourceIPv4NumericAddress: uint32
TranslatedSourceAddress: string
TranslatedDestPort: uint16
TranslatedDestIPv4NumericAddress: uint32
TranslatedDestAddress: string
