Supersedes: none

Document Class: Informative

Document Status: Work-in-Progress

Document Language: en-US
DMTF is a not-for-profit association of industry members dedicated to promoting enterprise and systems management and interoperability. Members and non-members may reproduce DMTF specifications and documents, provided that correct attribution is given. As DMTF specifications may be revised from time to time, the particular version and release date should always be noted.

Implementation of certain elements of this standard or proposed standard may be subject to third party patent rights, including provisional patent rights (herein "patent rights"). DMTF makes no representations to users of the standard as to the existence of such rights, and is not responsible to recognize, disclose, or identify any or all such third party patent right, owners or claimants, nor for any incomplete or inaccurate identification or disclosure of such rights, owners or claimants. DMTF shall have no liability to any party, in any manner or circumstance, under any legal theory whatsoever, for failure to recognize, disclose, or identify any such third party patent rights, or for such party’s reliance on the standard or incorporation thereof in its product, protocols or testing procedures. DMTF shall have no liability to any party implementing such standard, whether such implementation is foreseeable or not, nor to any patent owner or claimant, and shall have no liability or responsibility for costs or losses incurred if a standard is withdrawn or modified after publication, and shall be indemnified and held harmless by any party implementing the standard from any and all claims of infringement by a patent owner for such implementations.

For information about patents held by third-parties which have notified the DMTF that, in their opinion, such patent may relate to or impact implementations of DMTF standards, visit http://www.dmtf.org/about/policies/disclosures.php.

This document’s normative language is English. Translation into other languages is permitted.

Foreword

The *SPDM Conformance Test Suite Guidance* (DSP-IS0023) was prepared by the Platform Management Components Intercommunication (PMCI) Working Group.

DMTF is a not-for-profit association of industry members dedicated to promoting enterprise and systems management and interoperability. For information about the DMTF, see [http://www.dmtf.org](http://www.dmtf.org).

This version is the first version of this document. Future changes will be recorded in the change log in ANNEX A.
Conformance Test Suite

The following list is recommended by the DMTF PMCI Working Group for an SPDM conformance test suite. Each test provides an output file which documents the results of the test.

All the tests are open source. If issues are found, please submit the issues to the appropriate repository so they can be addressed.

These tests are described below, along with a link to the open source repository.

- SPDM Responder Conformance Validator

SPDM Responder Conformance Validator

This SPDM Responder Conformance Validator checks the conformance of an SPDM Responder implementation against Security Protocol and Data Model (SPDM) specification [DSP0274] (https://www.dmtf.org/dsp/DSP0274) and Secured message Using SPDM specification [DSP0277] (https://www.dmtf.org/dsp/DSP0277).

The test can be found at https://github.com/DMTF/SPDM-Responder-Validator.
